

777 Inventory Project — Full Project Quotation

PROJECT OVERVIEW

Design, development, and deployment of a comprehensive Multi-Branch Inventory & POS Platform for 777 Inventory. The platform covers 15 integrated modules spanning warehouse management, retail point of sale, multi-currency finance, analytics, and role-based security.

INVESTMENT SUMMARY

Description	Quantity
Modules Delivered	15 Modules
Unified Platform	1

MODULE-WISE BREAKDOWN

#	Module Name	Description / Key Features
01	Dashboard & Business Analytics	Real-time insights, gross values, best sellers, fast-moving items, and low-stock alerts.
02	Warehouse Management	Master stock control, container onboarding, direct adjustments, and stock valuation.
03	Shop & Retail Management	Individual branch inventory tracking, shop-specific currencies, and retail pricing.
04	Logistics & Internal Transfers	Secure stock movement between warehouses and shops with full traceability.
05	Point of Sale (POS) / Sales Recording	Recording sales, tracking selling prices, and calculating immediate profit margins.
06	Returns Management	Processing both Customer Returns and Internal Warehouse Returns (Damaged/Restock).
07	Multi-Currency & Exchange Rate Engine	Daily dynamic exchange rates converting local currencies (ZMW, INR) to base USD.
08	Finance & Profit Tracking	Automated calculation of average costs, profit margins, and currency conversions.
09	Expense Management	Logging operational expenses categorized by location with date filters.
10	Advanced Reporting Engine	Detailed views of stock health, transaction history, and sales ledgers.
11	Bulk Data Import/Export	Excel/CSV mass onboarding, data extraction, and fixing bulk inventory errors.
12	Real-Time Notification System	Instant alerts for stock movement, sales, and low-stock warnings dispatched to staff.
13	Role-Based Access Control (RBAC)	Secure permissions for Super Admins, Admins, Managers, and Shop/Warehouse Staff.
14	Audit Trail & Activity Logging	Immutable transaction logs tracking who performed actions, when, and where.

15 Cloud Database & Real-Time Sync

Live synchronization across multiple devices using Firebase architecture.

TERMS & SCOPE

INCLUDED IN THIS ENGAGEMENT

- Custom ERP development (all 15 modules)
- Production deployment & server setup
- Cloud database security configuration
- Multi-currency logic implementations
- Role-based access control setup

Note: Pricing and terms can be appended here as per your company's standard quotation format.
